DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to simulating and testing a manufactured channel decoder using a test signal.
- II. Claims 9-15, drawn to modifying a channel decoder based on a test message.
- III. Claims 16-19, 28, 34, 35, 37, and 38, drawn to storing a production test signal based on a test message.
- IV. Claims 20-27, 36, and 39, drawn to supplying a periodic test signal to a circuit under test.
- V. Claims 29-33, drawn to modifying a channel decoder based on a test message.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

Because these inventions are distinct for the reasons given above and the search required for each Groups I-V are distinct, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Marion, Biren Steven and Michael Ure on 12/29/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2125

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
